

# West Virginia Occupational Therapy Research Presents

## Caregiver's Perspectives on Play and Socialization Opportunities for Children after Traumatic Brain Injury

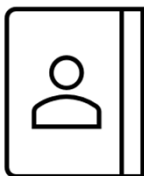

Are you a caregiver for a child that sustained a traumatic brain injury (TBI). Your participation could be beneficial in understanding the opportunities for play and participation in leisure and social opportunities following TBI.

### Requirements:

- Primary caregiver for a child under 18 years of age with a TBI after birth
- Must be an English speaker
- Must be 18 or older
- Access to a computer/phone with internet/data

### Study Information:

- Interviews will be conducted on Zoom at a convenient time for you
- Contact information below if you would like to participate in this study

**WVU IRB approval is on file.**

Contact for Questions or Concerns:

Amanda Acord-Vira 304-282-1495, [amanda.acordvira1@hsc.wvu.edu](mailto:amanda.acordvira1@hsc.wvu.edu)

*Your participation is greatly appreciated and will take approximately 1 hour to complete.*
